# **PROJECTS**

## FRONT-END DEVELOPER

## Code Bounty a Kahoot style code learning game.

I collaborated on a front-end website development project for ASU's SunHacks hackathon, where my team and I placed 3rd. Our project focused on delivering an intuitive and user-friendly interface, leveraging modern web technologies to create an impactful solution within the hackathon's tight time constraints. I contributed to designing responsive layouts, integrating dynamic features, and ensuring seamless navigation, which impressed the judges and showcased our ability to innovate under pressure.
